STEAM TRAIL

at Gene Day Park

We're blazing new pathways to learning with a special STEAM Trail series that highlights Science, Technology, Engineering, Art, and Math (STEAM) through outdoor exploration. STEAM Trails encourage children to observe clouds, birds, trees, and insects; explore concepts like balance, gravity, movement, and direction; recognize shapes, patterns, and numbers; and use creativity, imagination, and problem-solving skills. Each activity inspires discovery of the natural world while strengthening early learning, language development, and critical thinking.

85% of brain development occurs before kindergarten.

bornlearning trails encourage active learning through outdoor play and movement.

Outdoor play nurtures imagination, friendships, and resilience.

bornlearning is an initiative to unlock imagination and foundational learning in young children through outdoor play, but it's also more. It's a visible, enduring symbol of the community's commitment to our youngest learners.
